Temperatures & T-storm Chances

Severe thunderstorms possible today and tonight

Weather Forecast Office
Midland/Odessa, TX
Issued May 9, 2017 2:54 AM CT

Storms are possible across the north and east today. Some storms could become strong to severe, producing hail and strong winds.

The threat of severe storms increases tonight, with large hail, damaging winds, and an isolated tornado possible.

[f](#) [t](#) [v](#) NWSMidland

weather.gov/maf

Storms are possible this afternoon into tonight, with chances increasing tonight. Some storms through tonight may be strong to severe, with threats including hail, strong winds, brief heavy rainfall, and a possible isolated tornado. Have a plan in place to take action if a warning is issued!

Storm chances on the increase...

Tuesday, May 9th

An upper level storm system will slowly approach from the west, bringing a chance of showers and thunderstorms

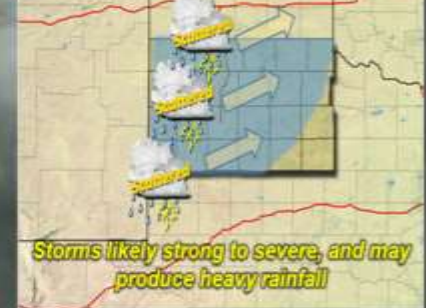

Today

Tonight

As skies clear out near the state line, there's a good chance that t-storms will develop in the late afternoon

Storms are expected to increase in coverage, and may form a line which sweeps across much of the area

[f](#) [t](#) [v](#) NWSLubbock

Thunderstorms are expected to develop this afternoon across far eastern New Mexico and the western South Plains, with additional storms tonight consolidating into a line of storms which will sweep across much of the area overnight. Severe weather including the threat of tornadoes will be possible with these storms.
